KUMMEP RINGPON TIMYIL

Entry-Level Hydrogeologist | Environmental and Engineering Geology

Girei, Adamawa State, Nigeria | +234 706 377 3672 | ringpon123@gmail.com | linkedin.com/in/ringpon-kummep-969318403

Professional Summary

B.Sc. (Hons) Geology graduate of the University of Jos (2025, CGPA 3.43/5.00) with coursework in hydrogeology, engineering geology and structural geology. Mapped 14 km² of crystalline basement terrain, using structural analysis to show the fracture trends that control drainage and to identify fractured zones as potential aquifers. Trained at the Nigerian Geological Survey Agency (NGSA) and produces drainage and DEM maps in ArcGIS Pro, QGIS and Surfer. Targeting entry-level roles in groundwater exploration, environmental assessment and geotechnical site investigation.

Education

B.Sc. (Hons) Geology, Second Class Lower Division | University of Jos, Jos, Plateau State | 2025

- CGPA: 3.43/5.00
- Relevant courses: Hydrogeology, Engineering Geology, Structural Geology, GIS and Remote Sensing, Geological Field Mapping, Igneous and Metamorphic Petrology
- Final-year project: Geology and Petrographic Study of Parts of Wulmi and Its Environs (Part of Pankshin Sheet 190NE), North Central Nigeria. Field and structural mapping at 1:12,500 scale with groundwater and economic assessment. Supervisor: Dr. I. C. Lekmang.

West African Senior School Certificate (WASSCE) | Sureq Model College, Abattoir, Jos, Plateau State | 2019

Field and Laboratory Experience

Industrial Trainee (SIWES) | Nigerian Geological Survey Agency (NGSA), Jos, Plateau State | [Month Year] – [Month Year]

- Took part in geological field mapping with NGSA field teams.
- Collected stream sediment samples for geochemical survey.
- Prepared samples and assisted with laboratory analysis.
- Wrote field and laboratory reports.

Independent Geological Mapping, Wulmi and Environs (B.Sc. Project) | Pankshin LGA, Plateau State | 2025

- Mapped 14 km² at 1:12,500 scale with GPS, compass-clinometer and topographic base maps.
- Measured joints, veins, dykes, foliations and faults; rose diagrams showed NE–SW and NW–SE trends that control the dendritic drainage pattern and weathering.

- Identified fractured zones as potential groundwater aquifers and found that shallow aquifers and streams are recharged mainly by seasonal rainfall.
- Described weathering of the four rock units, including spheroidal weathering, and assessed the rocks for construction aggregate and dimension stone.
- Prepared thin sections and carried out modal analysis on 4 representative rock samples.

Departmental Field Mapping Exercises | University of Jos | 2021 – 2024

- 2024: Kanam and Wase, Plateau State. 2023: Mazah, Miango, Barkin Ladi and other Jos Plateau sites. 2021: University of Jos and environs.

NYSC Experience

Corps Member, Department of Geology | Modibbo Adama University, Yola, Adamawa State | 2026 – Aug 2027 (expected)

- Assist final-year geology students with their research projects, including finding literature and reference material.
- Run library duties for the department and provide general technical and administrative support.

Freelance Experience

Cartographer and GIS Analyst | Self-employed | [Year] – Present

- Produce drainage, DEM, topographic, satellite imagery and geological maps for clients using ArcGIS Pro, QGIS, Surfer and CorelDRAW.

Technical Skills

Technical:

- Geological and structural field mapping (GPS, compass-clinometer, topographic base maps)
- Fracture and lineament analysis with rose diagrams
- Drainage and DEM mapping in ArcGIS Pro, QGIS and Surfer
- Rock and sediment sampling and sample preparation
- Thin-section petrography
- Python and Microsoft Excel for data handling
- Microsoft Word and PowerPoint

Soft skills:

- Technical report writing
- Teamwork in field crews
- Languages: English, Hausa, Taroh

Certifications and Professional Memberships

- Nigerian Mining and Geosciences Society (NMGS), Student Member
- Nigerian Association of Petroleum Explorationists (NAPE), Student Chapter Member

Leadership and Community Service

- Member, Digital Literacy Community Development Service (CDS) Group, NYSC Adamawa State | 2026 – Present
