KUMMEP RINGPON TIMYIL

Geology Graduate | Petrology, Field Mapping and Geospatial Research

Girei, Adamawa State, Nigeria | +234 ●●● ●●● ●●●● | ringpon123@gmail.com | linkedin.com/in/ringpon-kummep-969318403

Professional Summary

B.Sc. (Hons) Geology graduate of the University of Jos (2025, CGPA 3.43/5.00) with research experience in field mapping, structural analysis and thin-section petrography of Basement Complex rocks on the Jos Plateau. Currently supports final-year research students in the Department of Geology, Modibbo Adama University, during NYSC. Skilled in ArcGIS Pro, QGIS, Surfer and Python. Targeting graduate assistant, research assistant and M.Sc. positions in geology.

Research interests: igneous and metamorphic petrology, structural geology, pegmatite mineralization, GIS and remote sensing in geological mapping.

Education

B.Sc. (Hons) Geology, Second Class Lower Division | University of Jos, Jos, Plateau State | 2025

- CGPA: 3.43/5.00
- Relevant courses: Igneous and Metamorphic Petrology, Structural Geology, Geological Field Mapping, GIS and Remote Sensing, Hydrogeology, Engineering Geology
- Final-year project: Geology and Petrographic Study of Parts of Wulmi and Its Environs (Part of Pankshin Sheet 190NE), North Central Nigeria. Field mapping at 1:12,500 scale combined with thin-section petrography and modal analysis. Supervisor: Dr. I. C. Lekmang.

West African Senior School Certificate (WASSCE) | Sureq Model College, Abattoir, Jos, Plateau State | 2019

Research, Field and Laboratory Experience

Independent Geological Mapping, Wulmi and Environs (B.Sc. Project) | Pankshin LGA, Plateau State | 2025

- Mapped 14 km² (latitude 9°16′–9°18′ N, longitude 9°24′–9°26′ E) at 1:12,500 scale, delineating biotite granite (about 50%), migmatite (about 15%), granite gneiss (about 10%) and diorite (under 10%).
- Prepared thin sections and carried out modal analysis on 4 representative rock samples under plane- and cross-polarized light; quartz, plagioclase and biotite dominate, with minor orthoclase, hornblende and opaque minerals.
- Analysed joints, veins, dykes, foliations and faults with rose diagrams; NE–SW and NW–SE trends point to contrasting deformational events linked to the Pan-African orogeny.

- Concluded that similar mineralogy and textures across the units suggest related geological processes, and recommended further study of the pegmatites and the area's deformation history.

Industrial Trainee (SIWES) | Nigerian Geological Survey Agency (NGSA), Jos, Plateau State | 2024

- Took part in geological field mapping and stream sediment sampling.
- Prepared samples, assisted with laboratory analysis and wrote field and laboratory reports.

Departmental Field Mapping Exercises | University of Jos | 2021 – 2024

- 2024: Kanam and Wase, Plateau State. 2023: Mazah, Miango, Barkin Ladi and other Jos Plateau sites. 2021: University of Jos and environs.

NYSC Experience

Corps Member, Department of Geology | Modibbo Adama University, Yola, Adamawa State | 2026 – Aug 2027 (expected)

- Assist final-year geology students with their research projects, including finding literature and reference material.
- Run library duties for the department and provide general technical and administrative support.

Freelance Experience

Cartographer and GIS Analyst | Self-employed | 2025 – Present

- Produce geological, topographic, drainage, DEM and satellite imagery maps for clients using ArcGIS Pro, QGIS, Surfer and CorelDRAW.

Technical Skills

Technical:

- Geological and structural field mapping
- Thin-section preparation, petrography and modal analysis
- Structural data analysis with rose diagrams
- Rock and sediment sampling
- ArcGIS Pro, QGIS, Surfer and CorelDRAW
- Python, Microsoft Excel, Word and PowerPoint

Soft skills:

- Scientific and technical writing
- Literature review
- Mentoring students
- Languages: English, Hausa, Taroh

Certifications and Professional Memberships

- Nigerian Mining and Geosciences Society (NMGS), Student Member
- Nigerian Association of Petroleum Explorationists (NAPE), Student Chapter Member

Leadership and Community Service

- Member, Digital Literacy Community Development Service (CDS) Group, NYSC Adamawa State | 2026 – Present
