# KUMMEP RINGPON TIMYIL

**GIS Analyst and Cartographer | Geology Graduate**

Girei, Adamawa State, Nigeria | +234 ●●● ●●● ●●●● | ringpon123@gmail.com | linkedin.com/in/ringpon-kummep-969318403

## Professional Summary

B.Sc. (Hons) Geology graduate of the University of Jos (2025, CGPA 3.43/5.00) with training in GIS and remote sensing and freelance experience producing topographic, drainage, DEM, satellite imagery and geological maps. Proficient in ArcGIS Pro, QGIS, Surfer and CorelDRAW, with programming skills in Python and JavaScript. Brings field data collection experience from the Nigerian Geological Survey Agency (NGSA) and a 14 km² mapping project. Targeting entry-level GIS analyst, cartographer and geospatial technician roles.

## Education

**B.Sc. (Hons) Geology, Second Class Lower Division** | University of Jos, Jos, Plateau State | 2025

- CGPA: 3.43/5.00
- Relevant courses: GIS and Remote Sensing, Geological Field Mapping, Structural Geology, Hydrogeology, Engineering Geology, Igneous and Metamorphic Petrology
- Final-year project: Geology and Petrographic Study of Parts of Wulmi and Its Environs (Part of Pankshin Sheet 190NE), North Central Nigeria. GPS-based field mapping at 1:12,500 scale, structural analysis and geological map production. Supervisor: Dr. I. C. Lekmang.

**West African Senior School Certificate (WASSCE)** | Sureq Model College, Abattoir, Jos, Plateau State | 2019

## GIS, Field and Laboratory Experience

**Freelance Cartographer and GIS Analyst** | Self-employed | 2025 – Present

- Produce topographic, drainage, digital elevation model (DEM), satellite imagery and geological maps for clients.
- Process and analyse spatial data in ArcGIS Pro, QGIS and Surfer, and finish map layouts in CorelDRAW.

**Industrial Trainee (SIWES)** | Nigerian Geological Survey Agency (NGSA), Jos, Plateau State | 2024

- Took part in geological field mapping and stream sediment sampling.
- Prepared samples, assisted with laboratory analysis and wrote field and laboratory reports.

**Independent Geological Mapping, Wulmi and Environs (B.Sc. Project)** | Pankshin LGA, Plateau State | 2025

- Produced a 1:12,500 geological map of 14 km² from GPS-located field stations and topographic base maps, delineating four rock units.
- Analysed structural data with rose diagrams, showing NE–SW and NW–SE trends that control the dendritic drainage pattern.
- Recommended integrated digital mapping and geospatial software to improve mapping accuracy.

**Departmental Field Mapping Exercises** | University of Jos | 2021 – 2024

- 2024: Kanam and Wase, Plateau State. 2023: Mazah, Miango, Barkin Ladi and other Jos Plateau sites. 2021: University of Jos and environs.

## NYSC Experience

**Corps Member, Department of Geology** | Modibbo Adama University, Yola, Adamawa State | 2026 – Aug 2027 (expected)

- Assist final-year geology students with their research projects, including finding literature and reference material.
- Run library duties for the department and provide general technical and administrative support.

## Other Experience

**Web Developer and IT Technician** | Self-employed | 2023 – Present

- Build websites and web applications with JavaScript, Python and Git on Linux, and repair computer hardware and software.

## Technical Skills

**Technical:**

- ArcGIS Pro and QGIS
- Surfer for contouring and surface models
- DEM, drainage, topographic and satellite imagery map production
- Map layout and design in CorelDRAW
- GPS field data collection
- Python, JavaScript, Git, Linux
- Geological and structural mapping
- Microsoft Excel, Word and PowerPoint

**Soft skills:**

- Client communication and technical report writing
- Languages: English, Hausa, Taroh

## Certifications and Professional Memberships

- Nigerian Mining and Geosciences Society (NMGS), Student Member
- Nigerian Association of Petroleum Explorationists (NAPE), Student Chapter Member

## Leadership and Community Service

- Member, Digital Literacy Community Development Service (CDS) Group, NYSC Adamawa State | 2026 – Present
